## “The coming cyclical shift”

Dear Investor,

One of the frequent questions that we are asked is about the “overweight” position that we have on Industrials. Compared to the benchmark Index, we have an overweight position of 14.2% in Industrials as of 30th September 2020. Also, this sector has not done well in the stock market over the last year. Industrial production is down. The lockdown has affected this sector much more than other sectors like pharmaceuticals. We have a strong logic as to why we have this overweight position in Industrials. Here it is.

### Industrials are at a low ebb as far as the stock market is concerned:

Let’s take a look at the comparative weight of the industrials/capital goods in the Nifty 50 Index over the years:

#### **Nifty 50 Index - sector weights over the years**

Sector	Dec-02	Dec-07	Dec-12	Dec-17	Jun-19	Sep-20
Auto	5.6%	3.4%	8.8%	10.6%	5.7%	5.8%
Capital Goods	3.1%	10.5%	5.9%	3.8%	4.0%	1.7%
Cement & Cement Products	2.4%	2.1%	4.2%	1.6%	1.7%	2.1%
Consumer	17.9%	3.6%	12.3%	9.2%	10.7%	11.9%
Financial Services	11.7%	12.0%	29.5%	35.0%	40.4%	33.3%
Healthcare	8.3%	2.2%	5.0%	4.0%	2.2%	4.0%
Media & Entertainment	1.2%	0.4%	0.0%	0.8%	0.4%	0.0%
Metals & Mining	2.9%	9.0%	3.8%	4.5%	3.6%	2.2%
Oil & Gas	17.6%	25.4%	12.3%	12.7%	12.1%	16.7%
Others	0.9%	2.3%	0.3%	1.5%	1.4%	3.4%
Technology	24.2%	9.5%	11.4%	11.4%	13.7%	16.8%
Telecommunication	2.6%	11.4%	2.0%	2.5%	1.8%	2.1%
Utilities	1.6%	8.2%	4.5%	2.4%	2.3%	0.0%
<b>Total</b>	<b>100.0%</b>	<b>100.0%</b>	<b>100.0%</b>	<b>100.0%</b>	<b>100.0%</b>	<b>100.0%</b>

Source: NSE

The table above is revealing. The weight of “capital goods” in the Nifty Index is at a multi-year low. “Auto + Capital goods” is also cumulatively at a multi-year low. This means that this sector is neglected/forgotten, and that means that the stocks in these sectors are available at prices that are a multi-year low.

The point to be ascertained therefore, is about whether companies in this sector have adequate prospects for future growth, and whether such companies would continue to remain competitive.

**In our portfolio, which companies are we talking about?**

In our portfolio, the following stocks are dependent upon a revival of industrial/economic activity, whether it is in the auto space, or infrastructure space.

- a. Bosch
- b. Container Corporation
- c. Cummins India
- d. Exide Industries
- e. Blue Dart Express
- f. RITES
- g. Siemens
- h. SKF India
- i. Castrol India

You would have observed that **ALL** these companies are market leaders in their respective fields, with a long track record of profitability and cash flow generation. All of them continue to be competitive, and the recent slump in industrial activity notwithstanding, we have reasons to feel confident about the prospects of such companies over the next few years. In our opinion, the negative sentiment around such stocks makes these ideal for purchase at these prices:

Here now are our reasons for having a big position in these companies:

**Auto sector sales have shown a revival: Indian Automotive Sector Volumes**

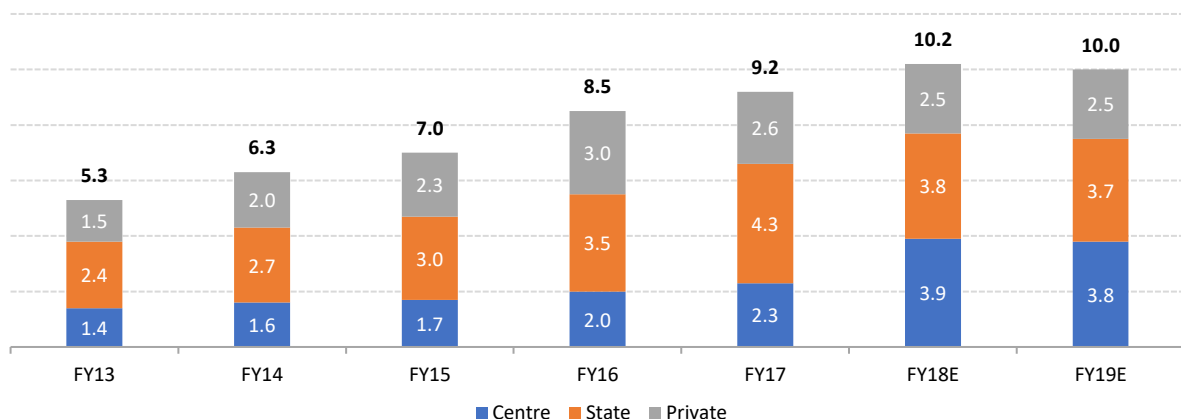

*Sales Volumes have picked up in the last quarter and is nearing last year volumes*

Source: SIAM

After a severely contracted quarter (ending June 2020), essentially caused by the lockdown following the Covid-19 pandemic outbreak, the September 2020 quarter has been much better. Although commercial vehicles have not yet recovered fully, passenger cars and 2 wheelers have more than recovered. We have reasons to be confident that post the full implementation of the Bharat Stage VI norms, and the beneficial impact of the increase in road infrastructure, the auto sector would see a further revival in fortunes.

This is how India’s spending on physical infrastructure has moved over the last few years:

**India’s infrastructure investment trend since fiscal 2013 (Rs lakh crore)**

Source: National Infrastructure Pipeline – Report of the Task Force, Dept of Eco Affairs, 2020

And this is how it is projected to move in the coming years:

### Sector-wise annual capital expenditure in infrastructure (Rs crore)

Ministry/ department	FY20	FY21	FY22	FY23	FY24	FY25	No phasing	FY20-FY25

Source: National Infrastructure Pipeline – Report of the Task Force, Dept of Eco Affairs, 2020

The stated intention is to increase the investment in infrastructure to Rs.111.30 lakh crores over the next 6 years, compared to Rs.51.16 lakh crores in the previous 6 years. Even if we discount these figures by 33%, the numbers are 45% more than the previous 6 years.

A bulk of this spending is earmarked for energy, roads, railways, irrigation and urban infrastructure. A sharp increase in spending in these areas would naturally benefit Industrials

The data given above are few of the main reasons why we are overweight on these sectors.

#### Recent policy decisions regarding encouragement of manufacturing

In addition, a recent report by Morgan Stanley highlighted the steps taken to improve the manufacturing sector in the country:

#### **Overview of the Targeted Policy Measures that Are Expected to Give Manufacturing an Impetus**

Measure	Objective and Impact
<b>Production Linked Incentive</b>	<ul style="list-style-type: none"> <li>Boost large scale domestic manufacturing of goods to bring about import substitution and increase global market penetration</li> <li>Currently mobile phones and medical devices have been provided support by PLI</li> </ul>
<b>Phased Manufacturing Programme</b>	<ul style="list-style-type: none"> <li>Promote self reliance by strengthening indigenous manufacturing capabilities by providing infant industry protection</li> <li>Currently support under the PMP has been announced for mobile phones and proposed for air conditioners</li> </ul>
<b>Reduction in Corporate Tax Rate</b>	<ul style="list-style-type: none"> <li>India lowered its base corporate tax rate to 25% and 15% for new manufacturing facilities</li> <li>This creates an investment-friendly environment and brings the tax rate for India broadly at par with the average for Asian countries</li> </ul>
<b>Labour Reforms</b>	<ul style="list-style-type: none"> <li>Codification and rationalisation of labour laws to facilitate flexibility in implementation</li> <li>Key states have taken the lead in tweaking state labour laws</li> </ul>
<b>Land Reforms</b>	<ul style="list-style-type: none"> <li>Creation of land banks so as to make land easily identifiable for industrial projects and simultaneously also provide details about logistics</li> </ul>
<b>Revision of MSME definition</b>	<ul style="list-style-type: none"> <li>Encourage MSMEs to grow in size while creating an enabling environment to foster innovation, investment and inclusive growth</li> </ul>
<b>Expanding Physical Infrastructure</b>	<ul style="list-style-type: none"> <li>Provides a bulwark for sustained economic growth by encouraging the multiplier effect</li> <li>Last few years have seen increased investment in road, rail, port sectors. Indeed, infrastructure investment has increased from 4.4% of GDP in F2015 to 5.7% of GDP in F2019</li> <li>Expanding infrastructure is a continuous process and as per the national infrastructure pipeline the total infrastructure investment is expected to be approx. US\$1350bn by F2025</li> </ul>
<b>Legal Infrastructure</b>	<ul style="list-style-type: none"> <li>Ensure judicial efficiency so as to facilitate ease of living and ease of doing business</li> <li>More work needs to be done here</li> </ul>

Source: Morgan Stanley research – India's Manufacturing at an inflection point – Sep 2020

Seen separately, these may not seem like much, but the cumulative impact of these measures can be considerable. One is confident that the cumulative impact of these measures, and the reforms announced in May 2020 in the Agriculture sector (already covered in our previous newsletters) augur well for the future economic growth of this country.

And these are not just plans. A recent report in the Economic Times (Oct 21st 2020) says that the Foreign Direct Investment (FDI) inflow in India during the first 5 months of this financial year (Apr-Aug 2020) was \$27.1 billion, and 16% higher than the inflow during the corresponding period of last year. Let us also not forget that this is during the Covid-19 pandemic.

Now, let us talk about the competitive strengths of the individual companies in our portfolio.

Company	Ownership	Competitiveness	5-year average RoCE	Stock discount to 10-year average valuation
<b>Bosch</b>	Multinational	One of the world's leaders in automotive research, supplies to the who's who in the world auto industry. 150-year history. Conservative accounting policies. Heavy investment in BS6 and electric vehicle parts.	20.97%	39.1%
<b>Cummins</b>	Multinational	One of the world's leaders in engines and genset manufacturing. Fully compliant with all emission norms. Catering to a wide range of industries and a primary beneficiary in an environment of industrial revival.	20.71%	19.3%
<b>Blue Dart Express</b>	Multinational	Market leader in express cargo. Very strong systems and processes. Extensive geographic reach throughout the country. Own planes ensure timely delivery of express packages. Premium pricing.	26.13%	25.8%
<b>RITES</b>	Indian	Steady track record in railway project consulting. Strong capex cycle in the railways bodes well for the company.	28.55%	21.6%

Company	Ownership	Competitiveness	5-year average RoCE	Stock discount to 10-year average valuation
<b>Container Corporation</b>	Indian	Unmatched infrastructure in the logistics space. A very likely beneficiary of the expected shift of freight movement from road to rail following the implementation of the dedicated freight corridor. A disinvestment candidate. A strong candidate for third party logistics business.	13.23%	25.2%
<b>Exide Industries</b>	Indian	Market leader in the automotive and industrial batteries segment. Nation-wide distribution network. Strong brand.	22.67%	26.5%
<b>Siemens Ltd</b>	Multinational	One of the primary companies in industrial automation, railway modernization and urban infrastructure.	32.70%	3.7%
<b>SKF India</b>	Multinational	Market leader in bearings. Strong track record over several years. Diversified customer base. A beneficiary of industrial revival.	24.14%	0.6%
<b>Castrol India</b>	Multinational	Very strong brand, market share and cash flows.	121.92%	50.7%

Data source: ACE Equity/Bloomberg. Data as of 27<sup>th</sup> Oct 2020.

Notes:

1. 5-year average RoCE (Return on Capital Employed) is a strong measure of how efficiently the company has managed its finances.
2. The discount of present valuation to 10-year average valuation is a good measure of how cheap the stock is.

If the company continues to be competitive and is expected to remain competitive in the foreseeable future, a sharp discount to its average valuation is an opportunity provided by a temporary slump to pick up a good stock relatively cheaply.

Our method of picking individual names, instead of focussing on the overall market index and its valuations, strikes us as particularly logical and filled with common sense. We find it far more logical to buy into a good company **before** it becomes popular rather than **after**.

As a reinforcement of this argument, let us look at the table given in Page 1 again. The Technology sector was rather neglected 3 years ago. But today the weight of that sector has increased from 11.4% to 16.8%. Financial services were extremely hyped up last year. Now the weight has fallen from 40%+ to 33%. Pharma/healthcare has almost doubled its weight in the index over the last year and a half.

We do not compromise on the quality of the company and are therefore less perturbed if the stock does not move up immediately after purchase. This is another reason why overall "Market PE" finds almost no relevance in our scheme of things. As seen from the table above, good quality companies are available at a steep discount to their historical valuations, at a time when the overall Nifty 50 PE multiple is at an all-time high. Given this situation, there is less need to worry about a high Nifty PE.

We wish you and your family a safe and a very happy festive season. This being the festive season, we would like to end this month's newsletter not with one, but two marvellous quotes from the great Warren Buffett. We think it is vital that every investor reads and internalizes these quotes so that we need not be diverted by the several trivia that bombard us every day through TV channels and the social media.

Warm regards

Yours sincerely,

**(E A Sundaram)**

*Chief Investment Officer and Portfolio Manager*

"The key to investing is not assessing how much an industry is going to affect society, or how much it will grow, but rather determining the competitive advantage of any given company and, above all, the durability of that advantage"

"For the investor, a too-high purchase price for the stock of an excellent company can undo the effects of a subsequent decade of favourable business developments."

Warren Buffett
